

POETRY ON EFFECT OF LOCKDOWN ON HUMANS , ANIMALS AND ENVIRONMENT;

Life for humans was going smooth,
but here comes corona with its prone.
Which forced us to live in our booth,
and taught us how to live alone.

Now human don't even trust
the other one of its own kind.
Because social distancing is a must
and it is the cure which we still can't find.

Non-human environment interaction
makes the air clean and visible,
Lead to increased wildlife fraction
while making human movement feeble.

One can see the mountain range
from a much long distance.
This all seems to be strange
but it is nothing more than nature's dance.

Many animals have reclaimed land,
Lockdown surely lead to economy loss.
But with time flowing like sand,
this will stop COVID spreading like a moss.
